

Online Course Statement of Accomplishment

Steven Yang

Has successfully completed a free online offering of **An Introduction to Computer Networks** provided by Stanford University through Class2Go.

An Introduction to Computer Networks:

This is an introductory course on computer networking, specifically the Internet. It focuses on explaining how the Internet works, ranging from how bits are modulated on wires and in wireless to application-level protocols like BitTorrent and HTTP. It also explains the principles of how to design networks and network protocols. Students gain experience reading and understanding RFCs (Internet protocol specifications) as statements of what a system should do. The course grounds many of the concepts in current practice and recent developments, such as net neutrality and DNS security.

Nick McKeown

Professor of Electrical Engineering and Computer Science
Stanford University

Philip Levis

Associate Professor of Computer Science and Electrical Engineering
Stanford University
